PROFESSIONAL SUMMARY

C# | .NET | ASP.NET | Angular | Typescript | Tailwind | Next | SQL | Entity Framework | Docker | Azure

Professional with **2+ years of experience** in system development, focused on **building APIs, integrations, and scalable applications**. Works primarily with a stack based on **C#, .NET, Angular, and relational databases (SQL)s**, with experience in data modeling and query optimization. Experienced in **REST API** architecture, Agile environments (Kanban), team-based development, and **version control with Git**. Focused on writing clean, well-structured, and maintainable code, applying OOP principles and best practices in daily work.

EDUCATION

Systems Analysis and Development
Uninter (JUL-2024 | DEC-2026)

Bachelor of Laws (LL.B.)
UCAM (JAN-2018 | DEC-2022)

EXPERIENCE

Full Stack Junior Developer
ConnectSea (AUG-2025 | PRESENT)

- Led front-end refactoring, migrating from Angular 15 + Bootstrap to Angular 18 with Tailwind and PrimeNG, building reusable components and accelerating feature delivery.
- Develop REST APIs using C# (.NET), implementing complex business rules, access control, and SQL Server integration via Entity Framework with Code First.
- Work on service integrations and messaging implementation using RabbitMQ, leveraging Docker for environment standardization.

Summer Intern Program
BTG Pactual Bank (JUL-2025 | AUG-2025)

- Developed front-end applications using Next.js, TypeScript, and Material UI, building dashboards and dynamic tables for critical business workflows.
- Implemented real-time communication using WebSockets and integrated with C# (.NET) back-end with JWT authentication.
- Contributed to process optimization and data centralization, helping reduce negotiation time by up to 70%, in environments using Docker, Kubernetes, and cloud (AWS/Azure).

Web Developer
Nalin Stores (FEB-2024 | JUN-2025)

- Developed full stack internal systems using Vue.js and TypeScript on the front-end. Node.js, C# and .NET on the back-end.
- Implemented service integrations and optimized SQL queries to improve performance and data consistency.
- Maintained and improved applications by fixing bugs and ensuring stability in an Agile (Kanban) environment.
